

Inlet and outlet section type B - top connection

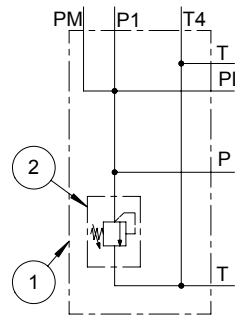

I06B has one pump port and one tank port, both facing upwards. The main relief cavity is on the B-side.

With this configuration the max system pressure can be 300 bar.

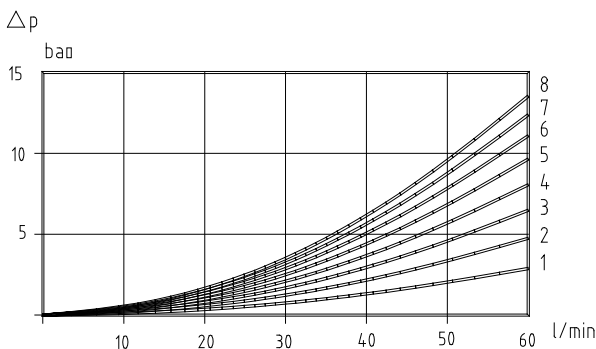

Note: Inlet of type B offers a connection between the tank galleries of A and B sides.

For information regarding the outlet - see outlet sections.

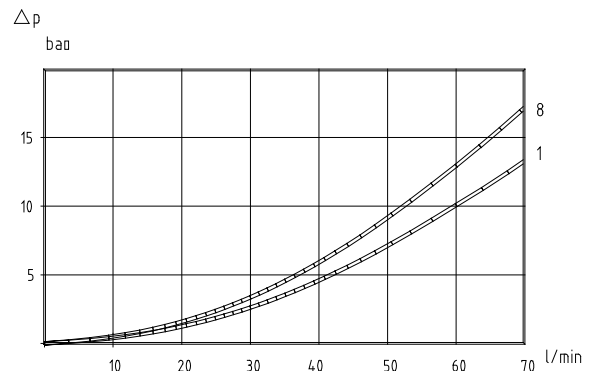

No. of sections	L mm	LF mm	LK mm
1	103	87	68
2	146	130	111
3	189	173	154
4	232	216	197
5	275	259	240
6	318	302	283
7	361	345	326
8	404	388	369
