

Tie-rod kit classification (appendix "A")

Tie rod kit allows the correct assembly of sectional valves. Tie rod's length depends on the number of sections; each valve is assembled with tie rod kits including a tie rod, two nuts and two washers. D6 requires 4 tie-rod kits.

Tie rod kit	Order Code	Lenght (mm)	Clamping Torque (Nm)	Quantity
D6/1	300105001	180		
D6/2	300105002	226		
D6/3	300105003	272		
D6/4	300105004	318		
D6/5	300105005	364		
D6/6	300105006	410		
D6/7	300105007	456	50	4
D6/8	300105008	502		
D6/9	300105009	548		
D6/10	300105010	594		
D6/11	300105011	640		
D6/12	300105012	686		

Painting

On request, all Hydrocontrol valves can be delivered painted (RAL 9005 black primer).

Order example of D6/1 painted:
