

ESECUZIONE NON RIPARABILE

Caratteristiche Tecniche:

Pressione massima di lavoro (PS): 250-210 bar
 Pressione di prova (PT) : PS x 1,43 / 1,3 / 1,5
 Corpo: in acciaio al carbonio verniciato
 Valvola azoto standard: 5/8" UNF (versione R)
 Metodologia costruttiva: esecuzione con cianfrinatura, senza saldature
 Temperatura d'impiego (TS): da -20°C a +80°C
 Sacca standard: adatta a oli minerali e a fluidi non aggressivi, non riparabile
 Installazione: orizzontale / verticale (valvola azoto verso l'alto)

Rapporto di compressione:
 - consigliato: P2/P0 = 2.5
 - massimo: P2/P0 = 4

Vita meccanica: il numero di cicli è inversamente proporzionale all'aumento del rapporto di compressione. Per utilizzo come smorzatore, la pressione di precarica deve rientrare tra il 60% e il 80% della pressione di lavoro in considerazione del tipo di pompa e del valore della temperatura.

Garanzia: vedi pagina dedicata
Parti di ricambio: vedi pagina dedicata

NOT REPAIRABLE EXECUTION

Technical Features:

Maximum working pressure (PS): 250-210 bar
 Test pressure (PT): PS x 1,43 / 1,3 / 1,5
 Body: made in painted carbon steel
 Standard nitrogen valve : 5/8" UNF (R version)
 Constructive methodology: execution with caulking, without welds
 Working temperature (TS): from -20°C to +80°C
 Standard bladder: can be used with mineral oils and non corrosive fluids, not replaceable
 Installation: horizontal / vertical (nitrogen valve upward)

Compression ratio:
 - recommended: P2/P0 = 2.5
 - maximum: P2/P0 = 4

Mechanical life: the number of cycles is inversely proportional to the increase of the compression ratio. For pulsation dampener applications, the nitrogen value must be from 60% to 80% of the working pressure also in relation with the type of pump and the working temperature.

Warranty: see dedicated page
Spare parts: see dedicated page

Also available:

- Outside epoxy painted as per standard FOX procedure or as project specification
- Bladders in HNBR, EPDM, FPM, HYTREL
- Connection with flange SAE 3000 - SAE 6000
- Connection with flange ANSI B16.5 or UNI/DIN
- Special connection on request
- H.../LT series for temperature up to - 40°C
- H...R series rechargeable with nitrogen valve 5/8" UNF
- H...M series rechargeable with nitrogen valve M28x1.5
- H...V series not rechargeable with fix nitrogen value
- Version 310 bar

Valvola azoto versione M
M nitrogen valve version
