Installation

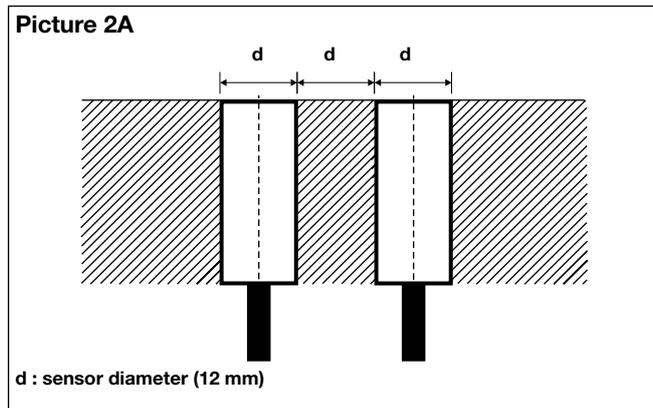

Flush sensor, when installed in damping material, must be according to Picture 1A.

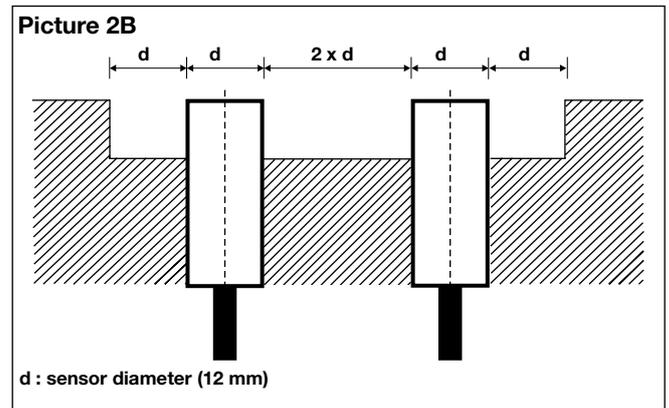

Non-flush sensor, when installed in damping material, must be according to Picture 1B.

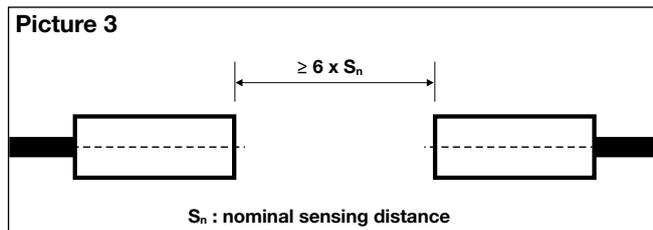

Flush sensors, when installed together in damping material, must be according to Picture 2A.

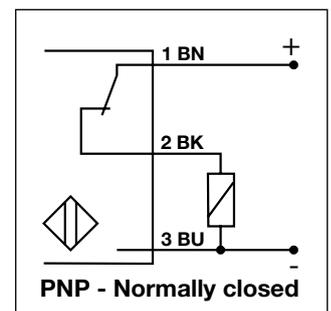

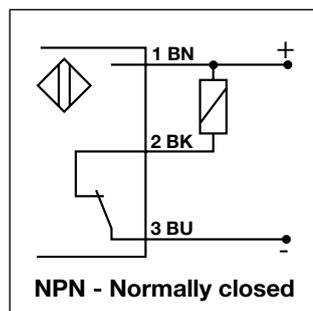

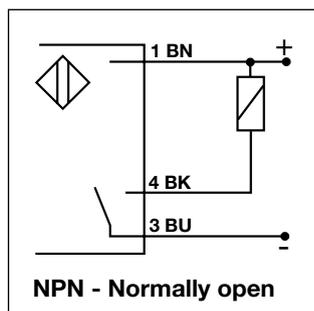

Non-flush sensors, when installed together in damping material, must be according to Picture 2B.

For sensors installed opposite each other, a minimum space of $6 \times S_n$ (the nominal sensing distance) must be observed (See Picture 3).

Reduction Factors

The rated operating distance is reduced by the use of metals and alloys other than Fe360.

The most important reduction factors for inductive proximity sensors are shown in Picture 4.
